

# USER GUIDE FOR CROSSWORD BOOK STORE

## IS 601 103 Web System Development

---

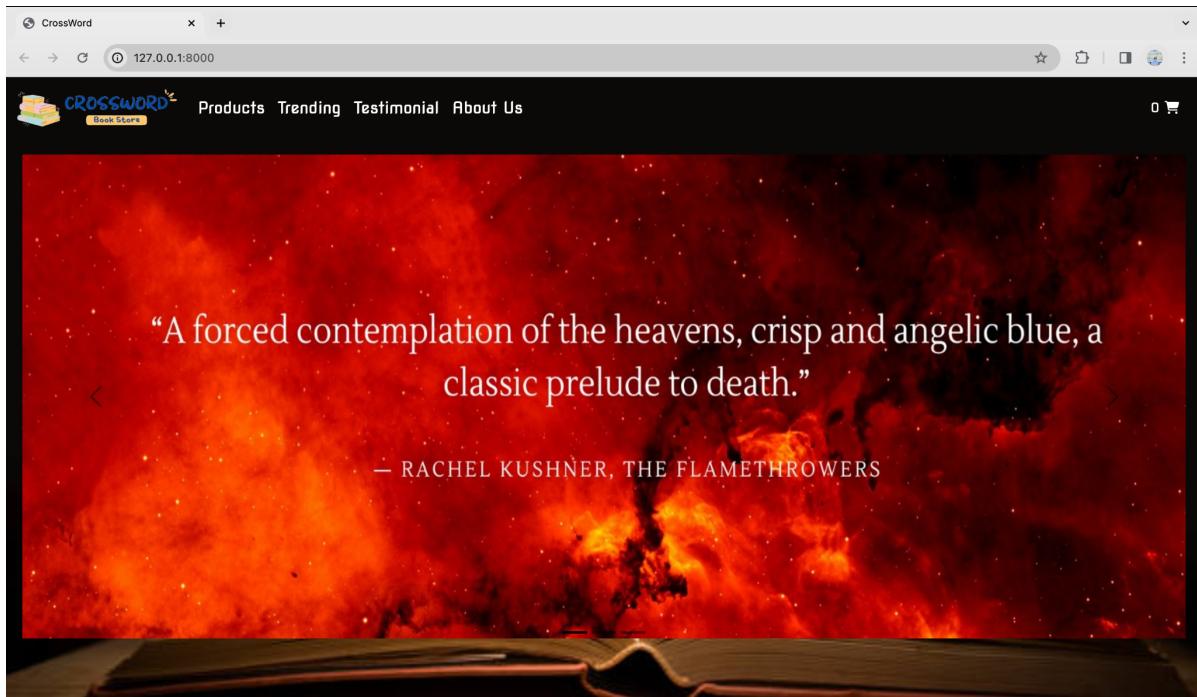

### → User Guide

**There are few steps to run the server and they are :**

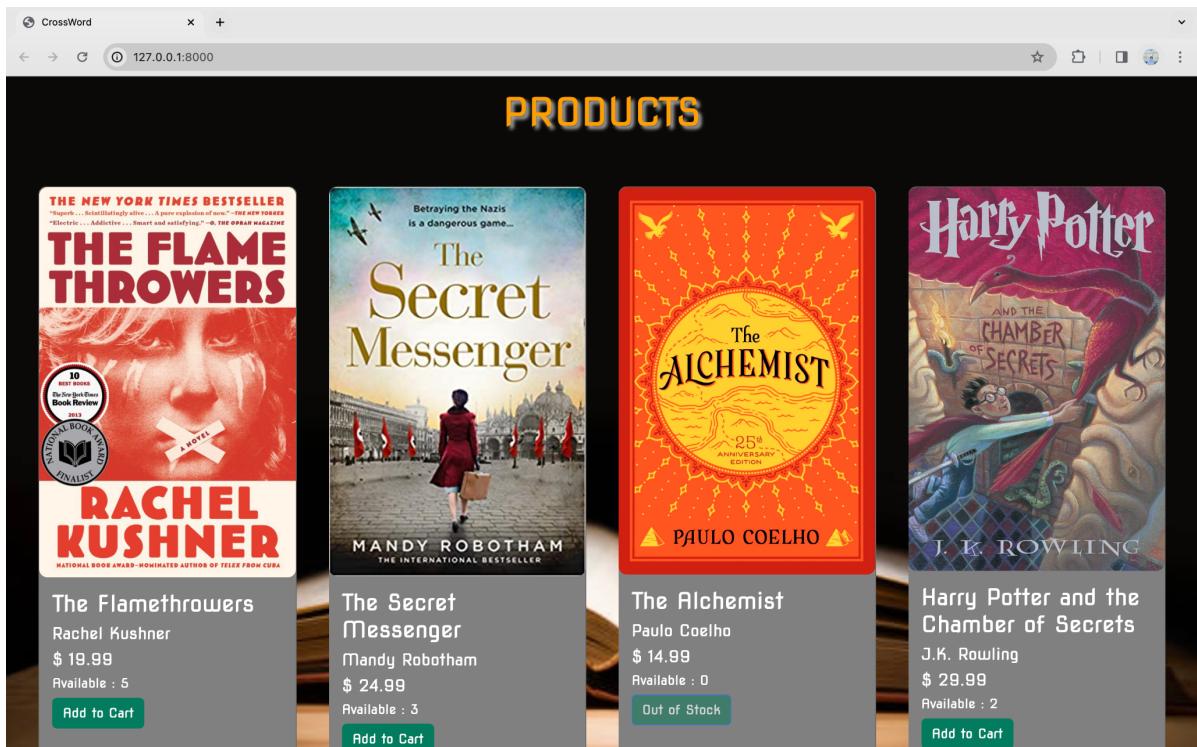

1. **Django and Python are pre-requisite to run this program.**
2. Unzip the folder and open the folder Web\_Pro which consist of two sub folders: crossword and venv.
3. Open terminal and activate the venv by writing the command: **source venv/bin/activate**
4. Then enter the subfolder crossword by writing the command: **cd crossword**
5. Then the last step is to run the server by the following command: **python manage.py runserver** or **python3 manage.py runserver**
